DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 9, drawn to a method for providing read-only data to a requester, classified in class 365, subclass 230.02.
- II. Claims 10 – 20, drawn to a read-only memory system, where read-only data is stored in combinatorial logic, classified in class 365, subclass 189.08.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case it is believed that both (1) and (2) are applicably true in regard to the practice of the present restriction.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
